

**REFRIGERATED COMPRESSED AIR DRYER 117CFM  
- CHICAGO PNEUMATIC CPX115**

\$2,439.51 inc. GST

SKU: CPX115

Categories: [Chicago Pneumatic](#), [Refrigerated Air Dryers](#)

**PRODUCT DESCRIPTION**

**REFRIGERATED COMPRESSED AIR DRYER 115CFM - CHICAGO PNEUMATIC CPX115**

**RELIABLE AIR DRYERS FOR YOUR COOLING NEEDS**

Our CPX series refrigerant dryers help to ensure your compressed air system is working efficiently, and in optimal shape. The refrigerant dryers work by cooling compressed air using refrigerant gases. Using this allows them to condense and remove the humidity in the air. We here at Chicago Pneumatic Compressors provide quality-assured, and reliable air dryers.

**Compatible Air Dryers**

The CPX series range is compatible with most compressor technologies and applications. All compressed air can reach a humidity of 100%, but with our air dryers, residual humidity is eliminated. This not only prevents water in your system but also results in absolutely dry air, which is essential for applications that require advanced air quality.

**Simple & Quality Assured System**

The simple design of the CPX series air dryers makes for a quick and easy plug & play installation. The components of our reliable air solutions are quality assured to ensure that your equipment runs efficiently. The dewpoint indicator included will help you to verify your air quality.

**Efficient Cooling System Lowers Lifetime Costs**

The overall total lifetime cost of your compressor can be enhanced by the use of an efficient cooling system. The intervals between services become longer, as there are fewer repairs to tools, machines and pipework needed. We understand that energy costs are an important factor, which is why we have created air dryers that are reliable and efficient.

**Features and Benefits**

**Cost Savings**

- Tools Last Longer
- Fewer System and tools repairs
- Low maintenance

**Easy Installation**

- Plug & Play
- Only one electrical connection
- Digital controller with easy pressure dew point display

**Great performance and reliability**

- Lower production and lower failure rate
  - Steady pressure dew point 3-7°C
- Quality rotary compressor with low power requirements
  - Efficient and reliable 3-1 heat exchanger
  - Hot gas bypass valve saves money

**Environment-friendly**

- Low (GWP) global warming potential
- Low (ODP) ozone depletion potential
  - Low power consumption
- Low impact R410a/R134a refrigerant

**CPX115 Data Sheet**

- Flow- 117cfm/3300L/min
- Max Operating Pressure- 13 Bar
- Pressure Dewpoint - 3- 7°C
- Environmentally friendly R410A refrigerant
  - Inlets/outlets R1"
  - Volts- 230 50hz
  - Width- 520mm
  - Depth- 500mm
  - Height- 800mm
  - Weight -60 Kg
- Capacities at reference conditions
