- Remote filter for connection to SR 900 gives greater freedom of movement and enables use of face shield.

PRODUCT DESCRIPTION

The Sundstrom SR905 is a remote filter holder that, together with half mask SR900 and breathing hose SR951 or SR952, is included in the Sundström respiratory protective device systems conforming to EN 12083.

The remote filter holder is to be equipped with filter(s). The air is inhaled through the filter and breathing hose to the half mask. The SR905 is intended to be used in the same environments as a Sundström half mask SR900. This gives you greater freedom of movement, less weight, and the half mask will be smaller in size, which makes it possible to use under visors. Filters for the SR905 are the same approved filters from the Sundström filter range that is used together with half mask SR900.

The belt attachment mounts in the users own belt. Other belt options are available as accessories.
